Seabrook Island lays claim to one of the widest, longest, and most dynamic beach shorelines in the Coastal Carolinas! There are almost four miles of pristine and peaceful sandy locales for you to explore.

North Beach is the first place light touches at dawn on Seabrook. It begins with an overture of rolling dunes held in place by sea oats and wax myrtles. The sheer size of North Beach makes it a dynamic part of the island. Wildlife is abundant here, and the soft sand is the perfect place to take everything in and watch for our resident dolphin pod.

Pelican Beach, also known as Sunset Beach, is very peaceful and is a perfect choice for young children to swim in the gentle waves and slow currents of the Edisto River as it meets the Atlantic Ocean.

The Sands at the Beach Club is where the action is! Head to the oceanfront pools, full-service bars, and restaurants to relax and enjoy the view. Here you can see both the sunrise and the sunset without ever leaving your chair. And you’ll have a full day of fun in between!

Seabrook Island Wildlife

The Seabrook Island community is dedicated to protecting and preserving the island’s natural resources. An Audubon International Cooperative Sanctuary, Seabrook is home to various wildlife, including bobcats, red and gray foxes, and white-tailed deer. Bottlenose dolphins often feed near Captain Sam’s Inlet during low tide. More than 30 species of reptiles can be found on the island, such as alligators, tree frogs, and chameleons. However, the loggerhead sea turtle is the reptile that gets the most attention. The island is also a haven for over 80 amazing bird species, including bald eagles, roseate spoonbills, pelicans, egrets, osprey, and more.

Dolphin Strand Feeding

The dolphins in our area are known for strand feeding, where they push fish onto the beach and then follow to devour them. We hope you are fortunate enough to witness this rare and incredible sight. More common in the spring and fall, feeding activity typically peaks within two hours of low tide. A favorite viewing spot is at the northernmost tip of North Beach at the Captain Sam’s Inlet.

Please follow these guidelines:

- Do NOT try to get close to, touch, swim with, or feed the dolphins – it’s dangerous and illegal.
- Keep your distance – avoid approaching a dolphin within 50 yards from a boat/kayak and 15 yards on land. Restricted area - no dogs allowed.
- Keep noise to a minimum.
- Report any inappropriate action to beach patrol.

Lights Out for Sea Turtles

- May 15 - October 31 •
- Turn off all lights visible from the beach by 9 PM.

OUR BEACHES ARE CRITICAL HABITAT AREAS

- Obey all signage.
- Please keep off the dunes.
- Do not approach turtles, hatchlings, or turtle nests.
- Do not allow dogs to chase birds.
- Never swim with or feed the dolphins – it’s dangerous and illegal.
- Fill in any holes on the beach when you leave.
- Glass containers may not be used on the beach.
